Deusto

Last week I was elected as student representative. It's great to get the support of my fellow students. I'm looking forward to promoting communication between students and lecturers, as this is a great tool for feedback and improvement of this course.

I have 4 years of experience in the university of Antwerp in the faculty of applied engineering. Speaking Dutch as well as English makes it easier to communicate with everyone involved.

I'm glad to have Ravindra Nalkande (Left in picture) helping me with this task.

Percieving Student-Faculty-Administration interaction as one of they key elements that holds good in making an education program successful one, I find myself fortunate to represent the Green Drive 2017 batch as Deputy Students Representative and contributing my bit to serve this purpose.

I am delighted to have an opportunity to pen down my views in this edition of our Newsletter. I look forward to working with Toon as a conduit between Students, Faculty and Administators. Having a substantial experience of a Student Representative in my Bachelors program, I see myself serving as liasion in surfacing the suggestions and feedback, back and forth among Students and University. We Green Drive students find ouselves fortunate to have been blessed with Faculty members who are globally minded and who appreciate international experiences. Also, our Administrators are immensely supportive through both actions and words. Hence, it is essential for us as students to come together and innovatively co-ordinate events to enhance the Student-Campus experience. All in all, it works out better when students, faculty and management are all on the same page. I wish to leverage the aforementioned purpose and contribute in creating a more vibrant campus life at Green Drive.
