Launch Joint Master's Degree in Sustainable Automotive Engineering

The new Joint Master's Degree in Sustainable Automotive Engineering (JMSAE) was launched in the University of Antwerp on Wednesday, 20 September 2017.

Within the framework of the Orientation week the students were welcomed in the Faculty of Applied Engineering.

During the first term in Antwerp the first generation of JMSAE students coming from India, Nepal, USA, Guatemala and Belgium will study and work together with exchange students from Poland, Spain, China and UAntwerp students from Electromechanical and Electrical Engineering, specialisation Automotive Engineering.

The JMSAE is a co-operation between universities and enterprises. The keynote speech was given by Mr Patrick Debal, Punch Powertrain, Powertrain Expert Advanced Development.

The University of Antwerp is very pleased to support the students during this exiting journey!

If you are interested to apply for September 2018 or you want to support this Joint Master by offering internships or master thesis projects, please contact sofie.krol@uantwerp.be.
